(FOR KEY SEE REVERSE)

The largest thermal electric power station in Czechoslovakia is being constructed at Hodonin (P 49/S 87). There are from 2,000 to 2,500 workmen working on it and it is to be completed in the summer of 1954. Large lignite deposits have been found in the area, which will supply the fuel for the station. New machinery is being installed that will use the lignite directly.
